

Service Solutions for Heavy Mining

AR
AIR RADIATORS

Service and Remanufacturing

Air Radiators is a world leader in the design and development of cooling systems which operate in the most arduous environments.

Our customers demand reliability and an understanding of expected downtime throughout the life of these products. Air Radiators provides peace of mind to our customers through service and remanufacturing options delivered with an original equipment mindset.

Servicing

Air Radiators can service your cooling systems at one of our many locations across Australia providing high quality workmanship while utilising original equipment parts.

Service Capability

- Air Radiators offer service options from single service through Nationwide fleet management
- Service completed on all makes and models of cooling system fitted to Caterpillar, Liebherr, Komatsu, Hitachi, Joy and many others
- All freight and logistics handled by Air Radiators
- Service workshops in QLD, NSW, VIC and WA, providing high quality workmanship
- Cooling products are serviced to Original Equipment standard
- Genuine OE parts incorporated on all service offerings
- 1 year parts and workmanship warranty on all service jobs
- Fast turnaround on all service work

Remanufacturing

Air Radiators provides a vital service to customers seeking to remanufacture vehicles. This activity is often completed using upgraded power train or engine options and require a cooling solution to meet the exacting needs of the application.

Remanufacture Capability

- Air Radiators offers a wide range of remanufacture options from reverse engineering to turnkey solution.
- Engineering design validation and verification professional services available for cooling system sign off.
- Increased thermal performance in the identical footprint.
- Incorporation of the latest radiator technologies to guarantee full life cycle performance.
