

# FLEXXAIRE REVERSING FANS FOR DIESEL ENGINES

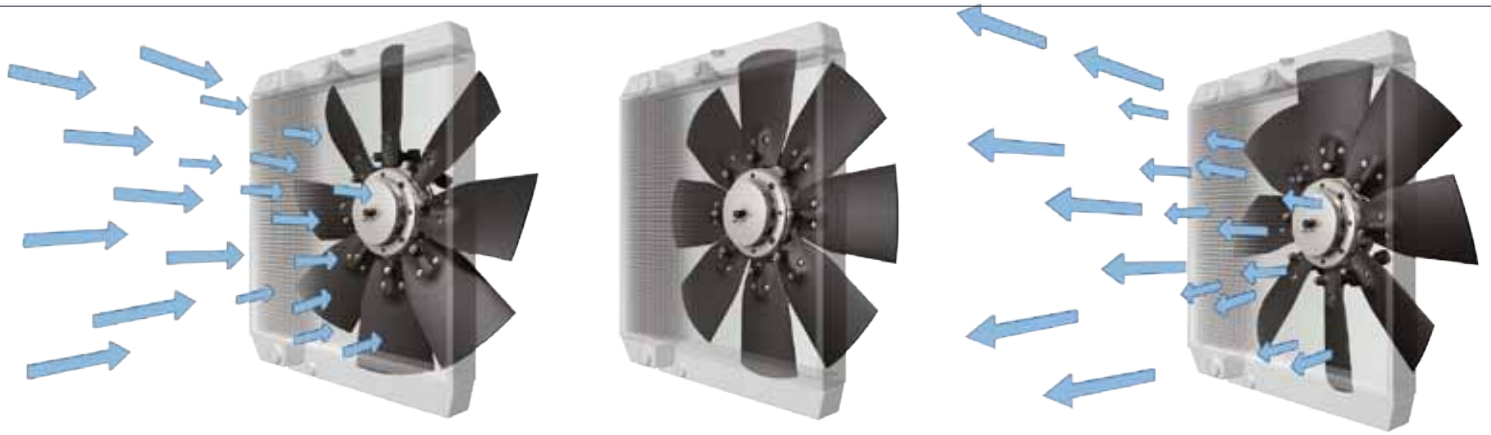

*Variable Airflow | Saves Fuel*  
*AutoReverse | Cleans the Radiator*

## Features of Flexxaire Fans

- Hydraulic or pneumatic actuation
- 16 inch to 61 inch size range
- Maintenance-free
- Simple installation

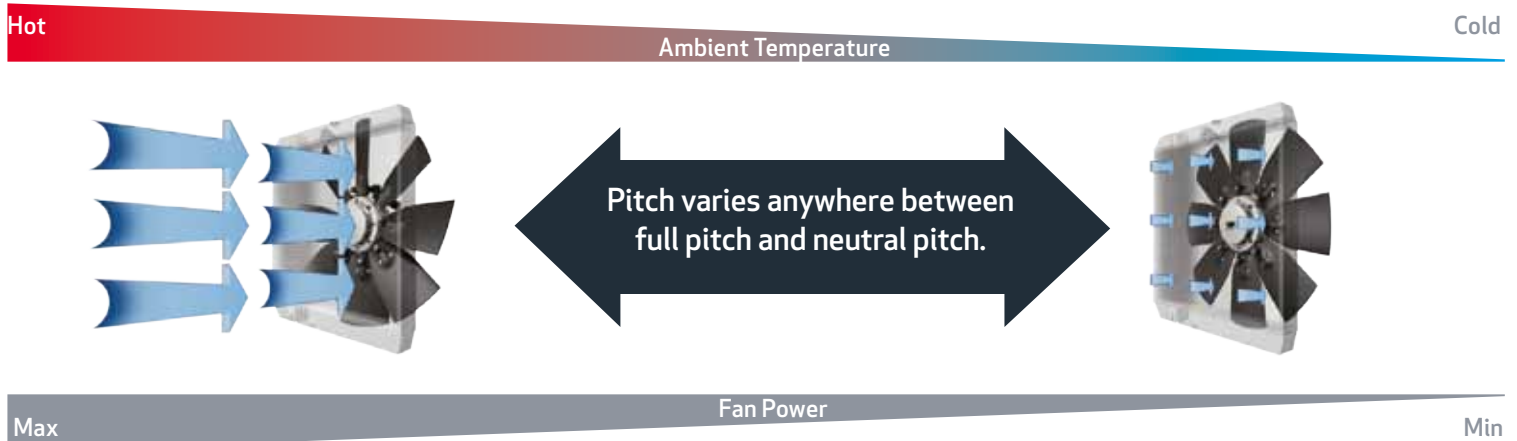

## AutoReverse | Cleans the Radiator

Flexxaire's automatically reversing fans smoothly transition from the Default position, through a Neutral pitch, to a Reverse position to blast debris from your engines radiator and prevent overheating.

- Reduce machine downtime
- Improve machine efficiency
- Prevent engine overheating
- Reduce engine fire risk

## Variable Airflow | Saves Fuel

Flexxaire's variable air flow fan system integrates with your engine's control system, monitoring real-time fluid temperatures and adjusting the airflow to minimize fan power draw and maximize cooling system efficiency.

- Save fuel
- Increase machine power
- Increase machine productivity
- Reduce machine noise
- Reduce emissions
