

# Case Study – Gold Coast University Hospital

## Application

- Critical emergency power installation for major regional hospital.

## Specification

- High efficiency twin circuit plate heat exchanger
- Cummins QSK78–G9 Generator set
- Low noise roof mounted remote horizontal cooling group

## Benefits

- Modular turnkey plug and play solution
- Reduced total cost of ownership via complete package solution

## Solution

- Heavy Duty cooling platform designed and built to last
  - Copper tube aluminium high performance heat transfer surface
  - Low noise low parasitic fan assembly solution
  - Complete piping kit modelled to suit specific installation criteria

## Volume

- Unique single project solution
