

Quality Engineer

- Full time role
 - Based in Lara
 - Market leading Australian manufacturer
-

Air Radiators is an award-winning Australian Manufacturer, committed to the design and delivery of Heat Exchange and fan solutions across diverse markets both domestic and international. With significant growth opportunities we are looking for a Quality Engineer.

Reporting to the Quality Manager, the successful candidate will be responsible for ensuring product meets customer specification and manufactured in compliance with production procedures, regulations, and systems. With a Plan-Do-Check-Act approach, to ensure that any non-conformities are identified and rectified, and a recurrence is prevented.

Key responsibilities include, but are not limited to

- Assist in the development and implementation of Quality / Inspection Plans
- Analyse problems reported and develop solutions / improvements to overcome them
- Prepare reports by collecting, analysing, summarising data and identify improvement needs
- Be a team player and willing to support all areas as needed
- Maintain and update Quality system documentation as appropriate
- Audit our system based on ISO 9001:2015 requirements
- Work with internal teams to increase customer satisfaction by improving process and product quality
- Drive process improvements to reduce the risk of external escapes. Engage production to proactively identify quality risks and drive improvements
- Follow-up on corrective action responses, ensure implementation of appropriate solutions and verify effectiveness

Key skills and experience required

- Bachelor's degree in Mechanical Engineering, Industrial Engineering or similar
- Minimum 3 years' experience as a Quality Engineer
- Experience with Quality Management Systems (QMS) and testing methodologies
- Strong problem-solving skills
- Preferred background would be from metals manufacturing or automotive type industry
- Excellent communication and presentation skills
- Ability to plan, organise and project manage
