

Applications Engineer - Graduate

- Market leading Australian Industrial Radiator manufacturer
- Use your passion in Heat Transfer to converse in real industry projects
- Grow professionally away from the CAD screen
- Permanent role based in Lara

Air Radiators is an award-winning Australian Manufacturer, providing specialised Heat Transfer systems for mobile and stationary applications. With over 45 years of industry experience and an impressive list of Australian and International customers, we have a highly regarded reputation for delivering top quality Heat Transfer systems.

This role would suit an engineering graduate keen to apply their skills working in a technical and fast paced industry. You will learn about our products and services from a supportive manager who will provide you with the tools and resources that you will need to be successful in this role. As well as key aspects of technical sales, solution selling, pricing, quotations, negotiation, and tenders you will be liaising internally across different divisions of the business and building a network of external industry contacts through building relationships.

Key responsibilities include:

- Work alongside team members in learning to engage and interact with customers
- Training in industry leading Thermal Software
- Undertake heat load calculations, selection, and equipment sizing
- Support in the preparation of proposals for submission
- Ensure work is completed accurately and to a high standard

Key skills and experience required

- Bachelor/Diploma of Engineering in Mechanical or Chemical
- A desire to learn and develop a career within our industry
- Ability to work as part of team and have attention to detail
- Fluency in English with strong communication and negotiation skills
- Australian citizen or permanent resident

Air Radiators is an equal opportunity employer, dedicated to diversity in the workplace and offers competitive salary - commensurate with experience including Income Protection continuance insurance.

If you want to be part of a great team and have the skills and experience to make a difference, then we would like to hear from you.
