

Project Engineer

- Full time role
 - Based in Lara
 - Market leading Australian Industrial Radiator manufacturer
-

Air Radiators is an award-winning Australian Manufacturer, committed to the design and delivery of Heat Exchange and fan solutions across diverse markets both domestic and international.

Due to continued growth, we are looking for a highly motivated and hardworking individual to be part of our Business Development Team. This role would suit a highly organised person who is comfortable working to tight deadlines with minimal supervision.

Key duties include, but are not limited to

- Work with our customers and internal stakeholders to develop the scope including application, technical and commercial information
- Develop the project plan and deliver to completion on time
- Work with department managers to assign resources to ensure projects are completed on time
- Continually review the project status, providing direct feedback and escalating matters as required
- Build and strengthen relationships with existing and potential new customers through regular contact, including face to face meetings, telephone and video calls
- Manage stakeholder expectations on technical and commercial matters
- Support sourcing of all required goods and services by working with Procurement or engaging directly with new and existing suppliers
- Prepares project status reports including summarised information and recommended actions
- Oversee necessary validation programmes or new product introduction, and manage technical sign off (external and internal)
- Manage the Bill of Material (BOM) preparation to required accuracy for costing and manufacturing purposes

Key skills and experience required

- Bachelor's Degree in Mechanical Engineering
- Proven experience in a similar role
- SolidWorks Experience
- Preferred background would be from manufacturing
- High attention to detail with strong communication skills
- Excellent planning, organisational and problem-solving skills
