

Technician/Tradesperson

- Full time
 - Based in Lara
 - Market leading Australian manufacturer
-

Air Radiators is an award-winning Australian Manufacturer, providing specialised Heat Transfer systems for mobile and stationary applications. With over 45 years of industry experience and an impressive list of Australian and International customers, we have a highly regarded reputation for delivering top quality Heat Transfer systems.

The Role:

You will be part of the Engineering Team with an opportunity to work close with the Engineering Development team on design, brainstorming, problem solving, validation and building prototypes

- Develop, implement, and validate new test methods and equipment to validate unique products and challenges
- Test products for safety, capacities, compliance, and performance
- Set up and conduct product durability and performance tests
- Operation of test rigs and equipment in the laboratory
- Programming of PLCs/HMIs and data logging equipment (e.g., dataTraker)
- Manufacturing jigs and fixtures and test samples for testing
- Examining and investigating specific aspects and components of products
- Sign off testing of products before shipment to customers as required
- Maintain lab and test equipment
- Prepare reports and documents including test reports and procedures
- Operating 3D printer, scanner, and Kreon measuring arm

Key skills and experience required

- Trade Certificate (Mechanical Fitter, Machinist or similar) is desirable
- 3-5 years' experience in a similar role
- Organised with the ability to prioritise work and complete tasks to tight timelines whilst maintaining attention to detail
- Highly effective interpersonal and communication skills for dealing with a diverse range of people
- Ability to plan, organise and project manage
