

Geelong, Victoria

Opportunity to work in growing organisation

Monday to Friday 6:30am – 3:00pm with a monthly RDO

Maintenance Team Leader

Air Radiators is a market-leading, vertically integrated designer and manufacturer of cooling solutions for high-end industrial applications and has an exciting future ahead as the industry diversifies from radiators for diesel engines to heating and cooling systems for the growing renewable sector of BEV and Hydrogen.

The company recently listed on the ASX through its parent – Adrad Holdings and is now looking at accelerating growth both domestically and internationally. New opportunities have arisen across its locations in Victoria, South Australia, and Thailand.

We are looking for a Maintenance Team Leader, reporting to the Facilities Manager at Air Radiators Lara. This role involves, working on the tools and as part of the maintenance team this role is responsible for ensuring maintenance and repair work is completed safely, effectively, and in a timely manner.
