

# Production Spray Painter

## About Us

Air Radiators is a leading Australian manufacturer of industrial cooling solutions, supplying customers across the mining, rail, defence and government sectors. As part of Adrad Holdings Limited, we are proud of our reputation for quality, innovation and delivering world-class products from our Adelaide manufacturing facility.

## About the Role

We are seeking a reliable and detail-focused Production Spray Painter to join our manufacturing team.

Working within our production environment, you will be responsible for preparing, painting and finishing fabricated metal components and assemblies to a high standard. The role is primarily focused on achieving a consistent, durable and professional finish across a range of industrial products.

While some paint mixing and colour painting is required, this role is predominantly production-based and suited to candidates with experience in industrial, manufacturing or trade spray painting environments.

## Key Responsibilities

- Prepare products for painting including cleaning, sanding, masking and priming
- Apply coatings using spray-painting equipment to achieve a consistent finish
- Mix paints and perform colour painting when required
- Inspect finished products to ensure quality standards are met
- Identify and rectify paint defects and imperfections
- Maintain spray guns, paint equipment and work areas
- Follow production schedules and work instructions
- Contribute to a safe, clean and organised work environment
- Work closely with production and quality teams to meet customer requirements

## About You

To be successful in this role you will have:

- Previous experience in spray painting within a manufacturing, industrial or production environment
- Strong attention to detail and pride in producing quality work
- Experience with surface preparation and paint application techniques
- Ability to work efficiently while maintaining quality standards
- Good communication skills and a team-focused attitude
- Commitment to workplace safety and quality processes
